Aspiring web developer with over two years of front-end and database management experience, seeking to take the next step in my career by transitioning to full-stack web development and design. With a proven track record of building responsive and visually appealing websites and applications, I am committed to leveraging my existing skills and acquiring new ones to create cutting-edge solutions that meet the needs of users and clients alike.

Professional Experience

Web Developer

Senpiper Technologies

- Built a fully responsive, new website from scratch for the company using Astro, and Tailwind CSS, with over 20 pages, in a period of 2 months.
- Collaborated on the development of new and existing features for the company's low-code platform, utilizing React to implement high-quality solutions.
- Contributed to the implementation of new functionality, bug fixes, and optimizations, and consistently ensured adherence to established coding standards and best practices.

Programmer Analyst

Cognizant Technology Solutions

- Processed and resolved user queries under defined SLAs, providing prompt resolutions for an internal sales, employees and opportunities tracking and management app developed for a renowned publishing firm as a client.
- Performed updates and changes to the database as per requests, ensuring data purity and structure.
- Created an ecommerce website as part of the Full Stack development training, using HTML/CSS, JavaScript, ASP .NET, Entity Framework, C# and MySQL.
